## 1. Introduction

The objective of this project was to develop an interactive web page. We decided on the topic of "Tourism" for our project.

Our Team Members are:

1) Student 01 – Kalani Perera

1. a) Task 01 – Presentation Page
2. b) Task 04 – Buy Products

2) Student02 – Saviru Peiris

1. a) Task 02 – Main Site Navigation
  2. b) Task 03 – Query Form
- c) Task 09 a – External CSS (created)

3) Student 03 – Thihansa Akmeemana

1. a) Task 06 – Quiz
2. b) Task 08 – Student Details

4) Student 04 – Levhan Hettiarachchi

1. a) Task 05 – Diagram (SVG)
2. b) Task 07 – Thumbnail Images

<b>Group Coursework Meetings</b> (minimum 6 meetings, e.g., one per week)		
1	Date & Time	3 <sup>rd</sup> March (Online)
	Objective	Decided on a website topic and allocate roles to students
	Attended	All Students attended.
	Your Contribution	I suggested making a website in entertainment subject.
2	Date & Time	5 <sup>th</sup> March (Online)
	Objective	Review and approve on the main page's design
	Attended	All Students attended.
	Your Contribution	I suggested that we should use previews of everyone's page to make the main page's body
3	Date & Time	12 <sup>th</sup> March (Online)
	Objective	Created the Repository
	Attended	All Students attended.
	Your Contribution	I created common CSS files and added a simple navigation bar in the main page
4	Date & Time	14 <sup>th</sup> March (Online)
	Objective	Finalized the navigation bar and shared the links
	Attended	All Students attended
	Your Contribution	I pushed the finalized navigation bar into the GitHub repository
5	Date & Time	19 <sup>th</sup> March (Face-to-Face)
	Objective	Meeting to discuss current progress
	Attended	All Students attended
	Your Contribution	I suggested what changes we should do to maintain a common style on our pages
6	Date & Time	23 <sup>rd</sup> March (Online)
	Objective	Finalized the Main page
	Attended	All Students attended
	Your Contribution	I added the query subject part of the main page
7	Date & Time	26 <sup>th</sup> March (Online)
	Objective	Discussed the Coursework report
	Attended	All Students attended
	Your Contribution	I send meeting details which I have hosted
8	Date & Time	30 <sup>th</sup> March (Online)
	Objective	Finalized the whole website
	Attended	All Students attended.

	<b>Your Contribution</b>	I suggested to remove font-styles from the universal tag So font- style in the navigation bar won't be override
--	--------------------------	---

## 2. Technical Discussion

Technical Discussion for Student Number 2's Tasks. For student 2, I have completed the following tasks,

- I. Main Site Navigation
- II. External CSS (created)
- III. Query Form
- IV. Main Page Part
- V. Additional Page Part
- VI. Page Editor

### Main Site Navigation

I had to design a navigation panel for the main (home) page in the main site navigation task. However, the first challenge that I faced was that I had to create it before others start their work. So firstly, I created the navigation panel without any CSS or JavaScript and sent it to other group members so they could start their part also.

One of the most important aspects of a website is the main navigation. So, I had to make navigation more responsive, but we haven't covered those theories in our module. So, I did a small course about media queries and other responsive theories on the LinkedIn Learning site. According to the coursework specification I had to use the hover effect also. Whenever I have some free time, I freelance on CSS designs. That experience I had made my work less Challenging.

This code is used to define and generate the website's navigation bar. It includes the website's logo, name, and links. The HTML code is the structure of the navigation bar, while the CSS code styles it. CSS styles are applied to specific elements using the class attributes in HTML code.

```

## External CSS (Created)

In the external CSS, the problem that I had was when others link my common CSS files it shouldn't override their existing CSS styles so to overcome this problem. I had to use unique IDs and classes since other members also need to add my CSS file. So, I used descendant selectors and unique IDs and classes to select my tags.

These codes are used to style the navigation menu. It positions and sizes with flexible layouts and the minimum height is set to be eight viewpoint height units. While the font family is “Poppins” with a sans-serif fallback.

When it's come to the external style sheet these CSS rules also appear for the anchor tags within elements with a class of “navbar”. The styles include setting the font colour to white, font size to 6rem and text decoration to none.

```
# StyleSheet.css > 43 *
1  *{
2    padding: 0;
3    margin: 0;
4    box-sizing: border-box;
5    font-family:'Poppins',sans-serif;
6    text-decoration:none ;
7    list-style:none;
8    scroll-behavior: smooth;
9  }
10
11 :root{
12   --bg-color: #fff;
13   --text-color:#221314;
14   --second-color:#5a7184;
15   --main-color:#6e54fa;
16   --big-font:6rem;
17   --h2-font:3rem;
18   --p-font:1.1rem;
19 }
20
21

## Query Form

In the Query Form task, I was given to create a query form related to our website content. Then I designed a raw design of my query form interface, but I didn't know which details should ask from the user. So, I did research and concluded that only the important information I should ask the user. Then I had a small conflict that should I do this on one page or should I use 2 pages to do this? Since we could use CSS and JavaScript, I chose to do this on one page.

The code creates a select element with the Id “menu icon” and the name “bx bx-menu” and it is used to provide users with a dropdown menu of options to choose from. The “Id” attribute uniquely identifies the select element whereas the “name”

attribute identifies the data in the form submission. The JavaScript code selects and saves references to various form fields as well as the submit button.

```

↳ CommentsForm.html > html > body > form#myform > header.sticky > ul.navbar > li
160
161     <div class="submit">
162         <input class="btn" type="submit" onclick="validateForm()" value="Submit">
163         <div class="thankyou" id="popup">
164             <!-- <h2>Thank you for your Feedback</h2>
165             <p>The details you entered has been successfully submitted.</p> -->
166         </div>
167     </div>
168
169
170     <div class="last-div" id="Contactus">
171         <p class="subline_1">The details you entered will be successfully saved and submitted.</p>
172         <p class="subline_2">This content is neither created nor endorsed by Google, Report Abuse-Term of Service-Privacy Policy</p>
173         <h2>THANK YOU!!</h2>
174     </div>
175
176 </form>
177 <script>
178     const form=document.getElementById('myform');
179     const thankMsg=document.getElementById('popup');
180     form.addEventListener('submit',function(event){
181         alert("Thank you for your Feedback!!")
182     });
183 </script>
184
185 <script src="SriLanka.js"></script>
186
187 </body>
188 </html>
```

```

JS SriLanka.js > ...
1  const header = document.querySelector("header");
2  window.addEventListener("scroll",function(){
3      header.classList.toggle("sticky",window.scrollY>0);
4  })
5
6  let menu=document.querySelector('#menu-icon');
7  let navbar=document.querySelector('.navbar');
8
9  menu.onclick=() =>{
10      menu.classList.toggle('bx-x');
11      navbar.classList.toggle('open');
12  }
13
14  window.onscroll=()=>{
15      menu.classList.remove('bx-x');
16      navbar.classList.remove('open');
17  }
```

First, I had a second thoughts on how I should call the javascript functions then I remembered in our lecture, the lecturer said we shouldn't mix our JavaScript and HTML. To validate which inputs are filled and which aren't filled. When the user fills out the form and clicks the view Submit button the “Submit Button” function will run.

And I wanted to change the style class if the user clicks the input field and moves to the next field without typing anything or selecting anything and especially if the user enters an invalid email. In the query details If the user clicks the edit button editQueryForm function will be executed and it will change the display value to none in the query details and display value to block in the query form. (W3Schools. [Accessed 15 March 2022])

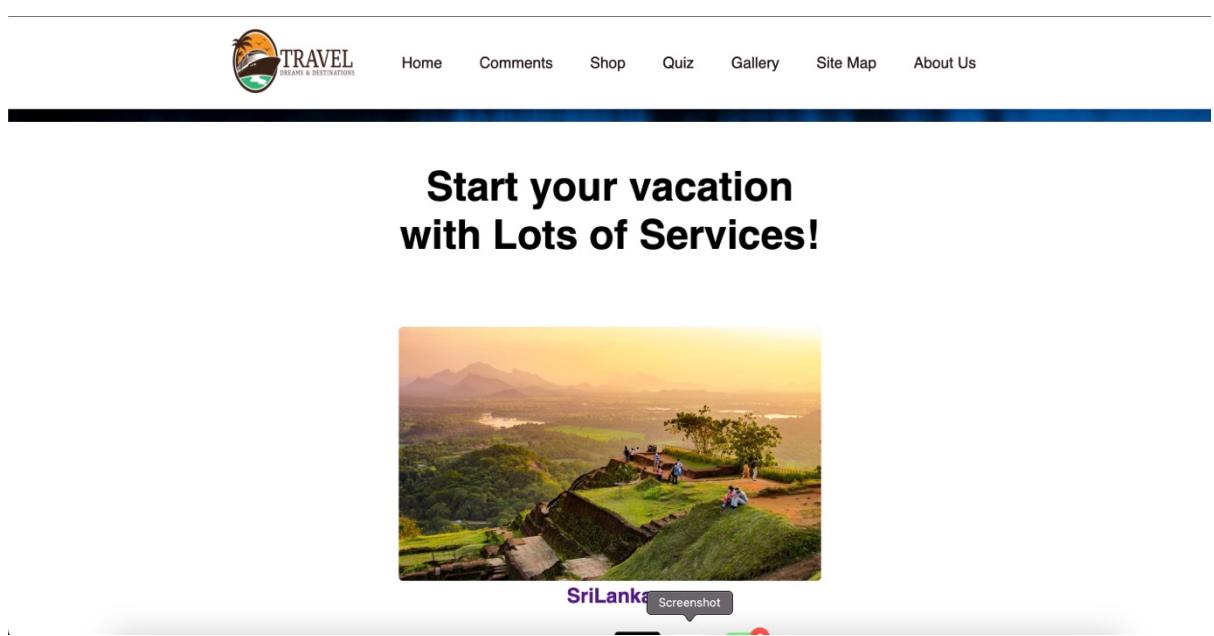

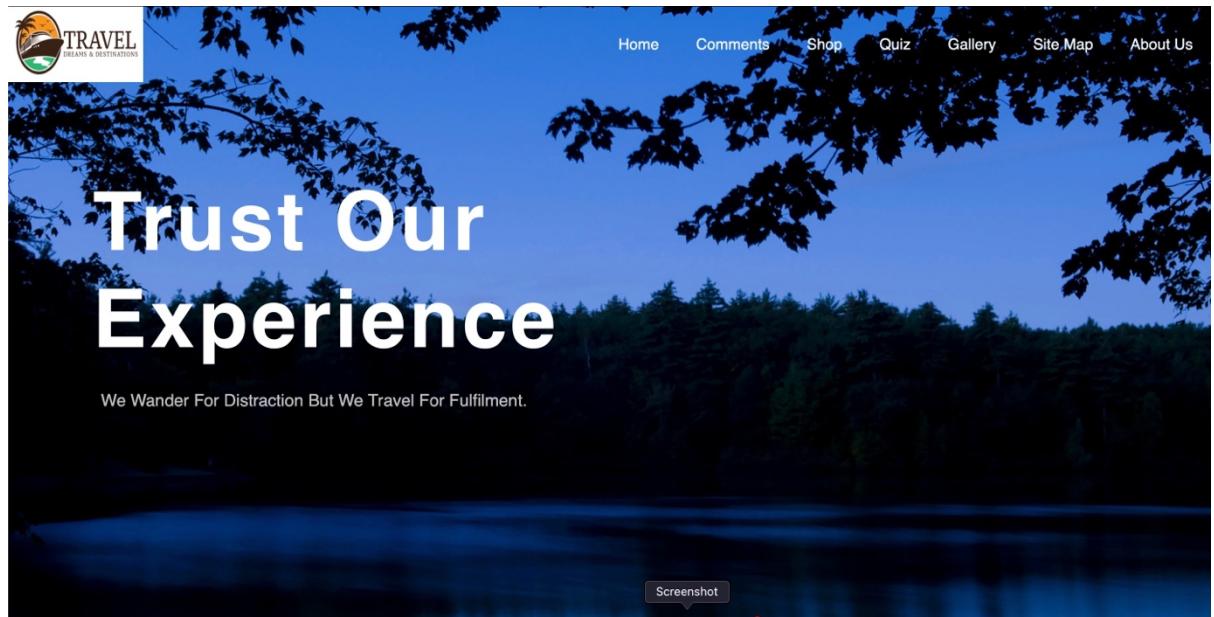

If the user clicks send button form details will be mailed to the mail address in the form action attribute. When I add subjects to choose from on the main page, I wanted to automatically select the respective subject on the form page. To do that I had to go through mdn web docs, and I found a urlParams method to do that and I implemented a function to select respective the value in the select tag according to the URL that passed in.

## Main Page Part

On the main page, I created a section to select the query subject. In, the challenge that I had was how to add a query part in the main page with a good design so I created all the subjects that the user can select if the user selects a subject by

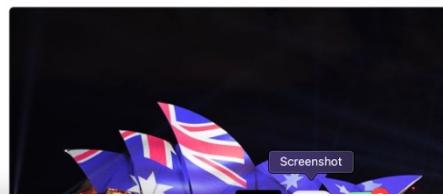

pressing the respective button it will redirect to the query form and the selected subject will be shown.

I used JavaScript to update the URL and I send that to the query form then I used that updated URL to select the selected subject.

## Additional Page

On the additional page, I was given the task to create something to display our packages. So, I thought the design I used on the main page is also good to use here and it will keep the consistent style in the webpage, so I used the same design with some small differences in the style. For the additional content page, I was used to using classes and IDs. From that, I linked my HTML files together and finished my styling part on the content page. For the additional page, I used the same navigation bar and the

footer to make me more colourful to the viewer. And I also added the editors' page in the footer so it will be easier for everyone to use that page for the viewpoint.

## Our Upcoming Tour Package

Editors Choice

## Page Editor Page

In the Page Editor Page, we conclude that we should keep a minimum same style for all four members, so we divided our work.

# Page Editor

**Name: Saviru Peiris**

**Role: Student 2**

**The following pages were edited by me!**

↓ [Jump to Bottom](#)

## Main page

Homepage we [ Screenshot ]  
 I aided with the javascript functions and events  
 Helped with the visuals and fonts

[Navigation bar](#)

## External Content Page

Created the additional page using html and css.  
 Used lot of css functions to make the page attractive.  
 Used hover effect box-shadows to highlight areas.

[Sri Lanka](#)

## Editor Page

Created an editor page using html and css.  
 Used anchor tags to link the other team mates pages and Images.  
 Used Hover effects, Media effects and used to forward with all the team members.

[Editor Page](#)

## External Style Sheet

Created an external style sheet and guide for teammates to follow.  
 The navigation bar and the footer are the main codes in those sheets.  
 Used similar colors and some font family to all the webpages to make it professional

[Style Sheet](#)

### 4. Janet

The travel webpage was developed with a strong concern about Janet's regulation. Any other people's content cannot be found on our website. There will be no breaches of privacy and security information on this website. Additionally, this website won't disclose users' information to any third-party organizations or individuals under any circumstances. Within this website, integrity will not be affected. Any of the information isn't modified hence there is no reason to doubt the correctness of the outcomes. This website would not provide, create, or show any offensive, inappropriate, obscene, or indecent content. Since this website was created for educational purposes, there won't be any spamming or unsolicited commercials or advertising content on the Travel website. website is solely focused on providing Tourism to the public. Therefore, our page doesn't have any material that is menacing in nature or is intended to harass, terrify, or intimidate people.

## Comments.html

The screenshot shows a travel-themed website with a blue background featuring palm trees, flip-flops, and a camera. At the top left is a logo for "TRAVEL DREAMS & DESTINATIONS". A navigation bar at the top right includes links for Home, Comments, Shop, Quiz, Gallery, Site Map, and About Us. A "Comments Form" box is centered, with a sub-box titled "Comments Form" containing the instruction "Share Your Experience With Us". It includes a red asterisk indicating a required field. Below this is a text input field labeled "Enter your Full name" with a placeholder "Your answer" and a "Screenshot" button at the bottom.

This screenshot shows a modified version of the comments form. The main question "Enter your Mobile number" has been replaced by a question asking for satisfaction levels from 0 to 10. The satisfaction scale is a horizontal row of ten circles, with the fifth circle filled blue. Below the scale is a text input field for "Please could you tell us your reasons for giving this rating?" with a placeholder "Text here...". A "Screenshot" button is located at the bottom of the form.

## PageEditor.html

**Name:Saviru Peiris**  
**Role: Student 2**  
The following pages were edited by me!

↓ [Jump to Bottom](#)

**Main page**

Homepage we work together  
I aided with the javascript functions, and events  
Helped with the visuals and fonts  
created a simple logo together.

[Main Page](#)

**Comments Form**

Created a Comments form with html,css and JavaScript  
added hover effects and altered visibility  
shows to submit the form to [Screenshot](#)  
For the alert javascript was

[Navigation bar](#)

**External Content Page**

Created the additional page using html and css.  
Used lot of css functions to make the page attractive.  
Used hover effect box-shadows to highlight areas.

[Sri Lanka](#)

**Editor Page**

Created an editor page using html and css.  
Used anchor tags to link the other team mates pages and Images.  
Used Hover effects, Media effects and used to forward with all the team members.

[Editor Page](#)

**External Style Sheet**

Created an external style sheet and guide for teammates to follow.  
The navigation bar and the footer are the main codes in those sheets.  
Used similar colors and some font family to all the webpages to make it professional

### Source

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

1. **Error** End tag `section` seen, but there were open elements.

From line 95, column 7; to line 95, column 16

```
iv></section>vv
```

2. **Error** Unclosed element `div`.

From line 44, column 13; to line 44, column 29

```
<div class="box">vv
```

### Appendix D: Individual Statement

Student Name:	P.S.M Peiris	Student Id:	20221069  W1954106
State what tasks you carried out in the project.			
Creating the Query Form.			
Creating Navigation Panel.			
Creating External CSS.			
Creating the main Page's Query Subject part. Creating package boxes in the Additional Page.			
State what you enjoyed and did not enjoy about teamwork.			
I really enjoyed working as a team contributing to a team project and using GitHub, Handling conflicts when we merge our branches to add our new updates.			
State what you learnt about teamwork.			

I learned how to brainstorm ideas with my team members.
How to work with friends as a team.
State what skills you gained/learnt from undertaking the project.
I learned how to use GitHub, and how to work as a team.
State any strengths about yourself that emerged whilst undertaking the project.
I am very good at listening to other members' ideas and getting the best out of all the ideas I have heard.
State any weaknesses about yourself that emerged whilst undertaking the project.
The weakness I found is I tend to point out team members if they haven't finished their part.
State how you would do things better if you were to undertake the project again.
I would make a schedule or a time timetable table then I could keep a track of my finished work.
Additional general or project specific comments:
The experience that I have got will be very useful in my future projects.

## Appendix E: Task Completion Checklist

<b>Student 1 Tasks</b>	<b>Completed</b>			<b>Student Comments</b>
	<b>Yes</b>	<b>No</b>	<b>Partially</b>	
1 - Presentation Page				
2a - Main (Home) Page				
4 - Buy products				
9b - External CSS (9a reused)				
10 - Extra content page/anchors				
11 - Page Editor				
12 - Logo/Page Editor				
13 - Additional Interactivity				
14 - Uploaded to Server				

<b>Student 2 Tasks</b>	<b>Completed</b>			<b>Student Comments</b>
	<b>Yes</b>	<b>No</b>	<b>Partially</b>	
2a - Main (Home) Page	Yes			On the main page, I created a section to select the query subject. In, the challenge that I had was how to add a query part in the main page with a good design
2b - Main site navigation	Yes			In the primary site navigation job, I was required to create a navigation panel for the primary (home) page. But I had to make it before other individuals started working, so that was my first obstacle.
3 - Query Form	Yes			I had to build a query form for the contents of our website for the Query Form task. Then I created a rough design for my query form layout because I wasn't sure what information I should request from the user.
9b - External CSS (9a reused)	Yes			To prevent other users from adding my CSS file, I had to use distinct IDs and classes. I therefore chose my tags using descendant filters, special IDs, and classes.
10 - Extra content page/anchors	Yes			I was offered the opportunity to design something to showcase our packages on the extra page. I, therefore, utilized the same concept but changed the style significantly.
11 - Page Editor	Yes			We came to the conclusion in the Page Editor Page that all four members should maintain at least

				the same style, so we divided our duties.
12 - Logo/Page Editor	Yes			As team members we all talked together and came for a final discussion for making the logo more attractive and simpler.
13 - Additional Interactivity	Yes			Added videos and Images for the content with different font sizes and families.
14 - Uploaded to Server	No			-

<b>Student 3 Tasks</b>	<b>Completed</b>			<b>Student Comments</b>
